# the perfect match

---

# the prisma promise

## “Experience the perfect match!”

With over 20 years experience supplying colouring solutions to the plastic, rubber, paint and ink industries Prisma occupies a unique position supplying all sectors of the polymer processing industry with custom solutions. We offer products tailored to your specific requirements using our extensive in-house knowledge. Every customer application is individually assessed and matched to ensure the ideal colour match is delivered on time and in the right packaging.

Completely independent from pigment manufacturers we use our knowledge of the colouring supply chain to negotiate on your behalf to ensure your application needs are met at the lowest possible cost. With a group capacity of 15,000 tonnes per annum across our flexible manufacturing units we respond to any order size from single bags to container loads. All capabilities are kept in-house ensuring that orders are fulfilled with the shortest lead times and our ISO9001 accredited laboratory and manufacturing facilities operate with 100% inspection to ensure your product is right first time.

We offer bespoke products and commit to work with you to ensure you get the best solution delivered with the best service.

If you are adding colour to your process then contact Prisma Colour today to experience the perfect match!

## THERMOPLASTIC MASTERBATCH & COMPOUNDS

### Fully integrated to meet your needs

The Prisma Thermoplastics Division manufactures colourant and additive masterbatch, technical polymer powders and compounds all under one roof.

Using our extensive knowledge of raw materials the laboratory team will formulate the most cost effective solution to meet the performance/technical requirements of any request.

We will work with you to develop a compound to meet your specific requirements. We also offer advice on polymer and additive selection.

- Polymer specific masterbatch – PE, PP, PS, PC, PA TPU, TPE, POM, PMMA, ABS, SAN, PET, PBT, EVA
- Universal colour masterbatch
- Additive masterbatch
- Technical thermoplastic compounds
- Polymer powders

Our manufacturing facility offers the highest level of service, quality and lead time to ensure your needs are met first time, every time.

Please contact our sales and technical team for a cost effective technical solution to meet your requirements.

## ROTATIONAL MOULDING DIVISION

### Cost effective colour compounding

Our facility in Stalybridge is dedicated to the production of rotational moulding compounds and masterbatches. The 5,000tonne per annum capacity plant manufactures high quality colour compounds ground to the highest industry specification in a variety of melt flow resins and density specification.

At Prisma we know that different applications require special powder qualities, with determined particle size distribution. So our powders for the rotational moulding industry are customized to match your requirement for colour and performance characteristics and tested for particle size distribution, apparent density, bulk factor and pourability.

- Any colour shade
- Custom colour matching
- UV Stable for outdoor use
- Impact resistant
- Wide range of MFI
- HD and LDPE available
- Bulk density tailored to suit your needs

## RUBBER AND SILICONE COLOURING SOLUTIONS

### The number 1 supplier

Prisma Colour Ltd is the premier supplier of colour to the Rubber and Silicone Industries in Europe.

Our customers choose Prisma Colour because of our superior technical and application knowledge enabling us to offer a perfect match to any application.

We offer a fully integrated manufacturing and laboratory capability which provides the highest level of responsiveness to our customers and is focused on meeting your needs and deadlines.

- PRISMAGUM colour masterbatch for the rubber industry
- PRISMASIL colour masterbatch for silicone gum and fluid
- Wax bound pigment dispersions
- Dry powder blends and dry liquids
- From bulk supply to sachet packs

## PIGMENT DISPERSIONS

### Formulated for your application

Prisma Dispersions offer a full range of pigment dispersions for surface coating and ink applications.

All formulations are matched to your application using our extensive range of pigment options and advanced dispersion knowledge. This ensures our product meets your needs.

- Solvent based pigment dispersions
- Epoxy pigment dispersions
- Plasticiser pigment dispersions
- Polyol pigment dispersions
- Aqueous pigment dispersions
- Pigment grinding service
- Universal pigment dispersions
- Resin specific pigment dispersions

We offer unrivalled quality through 100% inspection.

We are focused on meeting your delivery requirements and offer the highest levels of service. Our ISO9001 certified processes ensure your needs are met.
